

**CERTIFIED INSTALLERS COMPARISON SHEET**

<b>CHARACTERISTICS</b>	<b>CERTIFIED INSTALLERS</b>	<b>PROTEC III CHEM-RX</b>	<b>PROTEC III WITH ACRYLIC MEMBRANE</b>
<b>PARTICLE SIZE</b>	LARGE	SMALL	SMALL
<b>EASE OF PENETRATION</b>	DIFFICULT	EASY	EASY
<b>EASE IN APPLICATION</b>	DIFFICULT	EASY	VERY EASY
<b>CERTIFIED INSTALLER REQUIRED</b>	YES	NO	NO
<b>LEAVES SURFACE MEMBRANE-SHINE</b>	NO*	NO	YES
<b>TRUE CURE ASTM C309</b>	NO	NO	YES
<b>CURING AID</b>	YES	YES	YES, MEETS ASTM C309
<b>HARDENER/DENSIFIER</b>	YES	YES	YES
<b>COST PER SQUARE FOOT</b>	16 - 28 CENTS	.06 MATERIAL ONLY	.10 MATERIAL ONLY
<b>TIME TO TREAT 10,000 SQ. FT.</b>	TIME DETERMINED BY THE AVAILABILITY OF INSTALLERS	1.5 HR X 2 MEN	1 HR X 2 MEN
<b>HAZARDOUS WASTE</b>	YES	NO	NO
<b>WASTE FROM APPLICATION</b>	YES**	NO	NO
<b>INSTALL ON YOUR TIMELINE</b>	NO	YES	YES
<b>FLOOR CLEANING REQUIRED</b>	YES***	NO	NO
<b>QUALITY</b>	GOOD	VERY GOOD	EXCELLENT
<b>RESULTS</b>	GOOD	VERY GOOD	EXCELLENT

\*Some penetrating hardeners and densifiers will sit on the surface if they have not properly penetrated the concrete and this will leave a temporary shine. This type of product will wear off with abrasion, the shine will disappear and the concrete will be left exposed. The ability of the hardener/densifier to penetrate fully into the concrete surface dramatically increases the hardness and chemical resistance of the concrete structure.

\*\*Because of the type of resin being used, the competitor's product does not completely penetrate the concrete and will jell up as it sets. This jell has to be removed. It is considered hazardous waste and must be contained and dumped under the regulations in force. This hazardous waste should not be dumped on the ground at job sites.

\*\*\*If the floor is not sealed immediately after it has been finished, the installers can require that it be cleaned thoroughly before application of their product adding extra costs to the square foot price.

Comparison sheets is based on the information available at the time of printing.
