

ACRYLICS ARE THEY ALL THE SAME?

Cornerstone Coatings had to think outside the box to provide the Decorative Concrete Industry with the correct solution; an Acrylic that was engineered and designed for long-term exterior durability.

Common problems occurring with other acrylics such as frosting, discoloration, peeling, loss of shine, and inter-coat adhesion will be **eliminated** by using Cornerstone's Premium Acrylic Cross-linking Technology. Premium Acrylic outperforms other acrylic sealers by up to 5 times. It is the strongest most durable formulation on the market for exterior applications.
